Purchase Evaluation Form**

Department: Police

Presented By: Don Brite

Date: May 4th, 2020

Department Budget Status:

- I. Purpose/Overview: To purchase GPS system for the patrol vehicles mobile data terminals, (MDT's).

- II. Background Information: The police department utilizes MDT's in the patrol vehicles. MDT's allow the officers access to our RMS system, which is used for report writing, and other functions related to the RMS. This ties in to Williamson County dispatch center, which sends calls and information to the MDT's for the officers on patrol. Williamson County dispatch utilizes GPS for safety of the officers and to give out calls based on officer location related to where the call is located. This system also allows for the Wi-fi connection and Automated Vehicle Locator, AVI. We initially reviewed the Cradle Point system and did a demo with their system. The system would routinely drop their service, causing the MDT's to lose connection. We just conducted a demo with Sierra and the system met our expectations and requirements.

- III. Financial Impact to Budget. \$59,053.80, includes 1 year maintenance. Maintenance cost per year after is \$6,240.00 based on current users. This cost has been accounted for in next years budget.

- IV. Alternative Options:

- V. Staff Recommendations: Recommended to purchase Synovia Solutions GPS system based on pricing and functionality.
