

**RESOLUTION 22-245**

**A RESOLUTION OF THE CITY OF SPRING HILL, TENNESSEE TO REQUEST  
DESIGNATION OF THE PROPERTY LOCATED AT 407 MCLEMORE AS A  
HISTORICALLY SIGNIFICANT SITE**

**WHEREAS**, it is the policy of the City of Spring Hill to promote the preservation and protection of the physical character and quality of life in the city; to promote the educational, cultural civic awareness and general welfare of the city while providing a sense of commitment and continuity between the past and present through the encouragement of preservation and protection of historically significant sites and structures; and to foster civic pride and historic recognition through the preservation of the City's heritage; and

**WHEREAS**, The City of Spring Hill, owner of the property at 407 McLemore, pursuant to Title 2, Chapter 4, Section 2-405(2)(d) of the City of Spring Hill Municipal Code, seeks to designate the site as a Historically Significant Site.

**WHEREAS**, Title 2, Chapter 4, Section 2-406 of the City of Spring Hill Municipal Code provides that sites in the City of Spring Hill may be designated as Historically Significant Sites by resolution of the Board of Mayor and Aldermen upon recommendation of the City of Spring Hill Historic Commission; and.

**NOW, THEREFORE BE IT RESOLVED**, by the Board of Mayor and Aldermen of the City of Spring Hill, Tennessee do hereby request that the property located at 407 McLemore be designated as a Historically Significant Site.

**Passed and adopted by the Board of Mayor and Aldermen of the City of Spring Hill, Tennessee, this 7 Day of November , 2022.**

**REQUEST:** Approval of Resolution 22-245  
**SUBMITTED BY:** Tony Tolstedt, ACA  
**DATE:** November 7, 2022  
**RE:** Historic Designation of Old City Hall (407 McLemore)  
**ATTACHMENTS:** Required Supporting Documentation (Exhibit A)

---

**PURPOSE:**

Resolution 22-245 authorizes application to the Spring Hill Historic Commission for designation of the Old City Hall building as historically significant pursuant to Spring Hill Municipal Code (SHMC).

**BACKGROUND:**

Pursuant to SHMC Section 2-406 of the SHMC, Designation of a site as historically significant may be done by the (BOMA) following recommendation for the Historic commission and application from the property owner for said designation.

Criteria for said designation is contained in SHMC Section 2-407 and are provided as follows:

*(A) The quality of significance in the city's history, architecture, archaeology and culture is present in districts, sites, buildings, structures and objects that possess integrity of location, design, setting, materials, workmanship, feeling and association, and that:*

- (1) Are associated with events that have made a significant contribution to the broad patterns of the city's history;*
- (2) Are associated with the lives of persons significant in the city's past;*
- (3) Embody the distinctive characteristics of a type, period or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components lack individual distinction; or*
- (4) Have yielded, or may be likely to yield, information important in prehistory or history.*

*(B) Ordinarily cemeteries, birthplaces or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature and properties that have achieved significance within the past 75 years shall not be considered eligible for the city's historic register. However, such properties will qualify if they are integral parts of districts that do meet the criteria or if they fall within the following categories:*

- (1) A religious property deriving primary significance from architectural or artistic distinction or historical importance;*
- (2) A building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event;*
- (3) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his or her productive life;*
- (4) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features or from association with historic events;*
- (5) A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; and*
- (6) A property achieving significance within the past 50 years if it is of exceptional importance.*

The City is currently the owner of the property denoted as Old City Hall which is located at 407 McLemore. The denoted property is currently being used as office space for IT and Emergency Management personnel. If Resolution 22-245 is approved, the application for a historically significant designation will be forwarded to the Historic Commission for consideration. If approved by the Historic Commission, BOMA would then be required to formally designate the property as historically significant per a separate resolution.

**FINANCIAL IMPACT:**

Designation of a property as historically significant per the proposed process does not inherently provide for any specific cost impact. However, designation does require future site plan review processes take steps to ensure that appropriate measures are taken to protect the structure and the immediate grounds when development or redevelopment occurs on adjacent property.

**STAFF RECOMMENDATION:**

Staff recommends that the BOMA approve resolution 22-245 to authorize application to the Spring Hill Historic Commission to designate the denoted property as historically significant.

*Life as I Remember*  
*Spring Hill in the Mid-Twenties (1926)*

BY G. W. BOWMAN

Written for 1976 and Homecoming 1986 Contests

AS I REMEMBER SPRING HILL IN THE MID-TWENTIES, this was the turning point in life styles. The horse and the railroad had just reached their peak.

Most all freight and passenger service was by rail. The automobile was still a luxury. Every owner had to keep a horse and buggy. The car could only be used in nice weather. When it rained the country roads were impassable. Most of the streams that crossed a road had to be forded.

I believe there were two trucks in town. One went to Columbia several times a week for supplies as they were needed and the other went to Nashville two times a week. Everything else came by rail to the Depot and was hauled by wagon to town. All mail came in by train and I think there were four deliveries a day. The Depot was the center of activity. Most everyone who went any distance went by train. Some of the school children rode the train.

As I remember Spring Hill in the mid-twenties there was a hotel where the bank now stands. It had a large front porch where most all public speakings and gatherings were held. There was a hardware store, which also had groceries, feed, and seed. Hardware included wagon and buggy parts, horse drawn implement parts, horseshoes and nails, and rough iron for blacksmith work. They had only small amounts of seed because most people saved their own seeds.

There were four grocery stores, one of which carried meats, and one meat-market. All meat at this time was home butchered.

Butter could be bought in the store but milk was from your own cow or from a neighbor who had cows. There was a cream station that bought on a butterfat test, so most people separated the milk and sold cream.

There were two garages with gas pumps.

There were two blacksmith shops. One where City Hall now stands on McLemore Avenue (1976) with hitching posts all around it. It was

the Hitch Yard. The blacksmith shops were very active, as everyone had to go to the shop for repairs for wagons, buggies, horse drawn and hand tools, and horses shoeing. The children liked to watch the blacksmith make and repair things and they liked the icehouse where they could pick up chips of ice to eat.

There were two restaurants and two press shops.

Branham and Hughes Military School was the big employer in town. There were about one hundred fifty boarding students plus about twenty-five local students. Most of the local students worked out their tuition on the grounds. They had several ball fields, a golf course, and a drill field so there was plenty of work. There was lots of activity in the fall and spring when students were arriving or leaving for the school term. Most of them arrived on the train and had to move into the dormitories. Then in the spring they moved out.

There were four churches in town that the students attended. As they went they all marched in formation. The black people also had two churches.

There was one bank, one dry goods store, two barbershops, and a post office. There were three rural carriers. Mail service was very good then. You could order anything by mail and get it in four or five days from Chicago, Illinois. The mail order business was good during these times.

Bus service started about this time. One, the Gray Line, forerunner of the Greyhound, had buses made on truck chassis like school buses. The others were just big cars. They had so many one ran about every thirty minutes. This started the railroad passenger service on the decline and today the depot no longer exists.

During the twenties there were several big local orchards. The packing and shipping of fruit was a big operation.

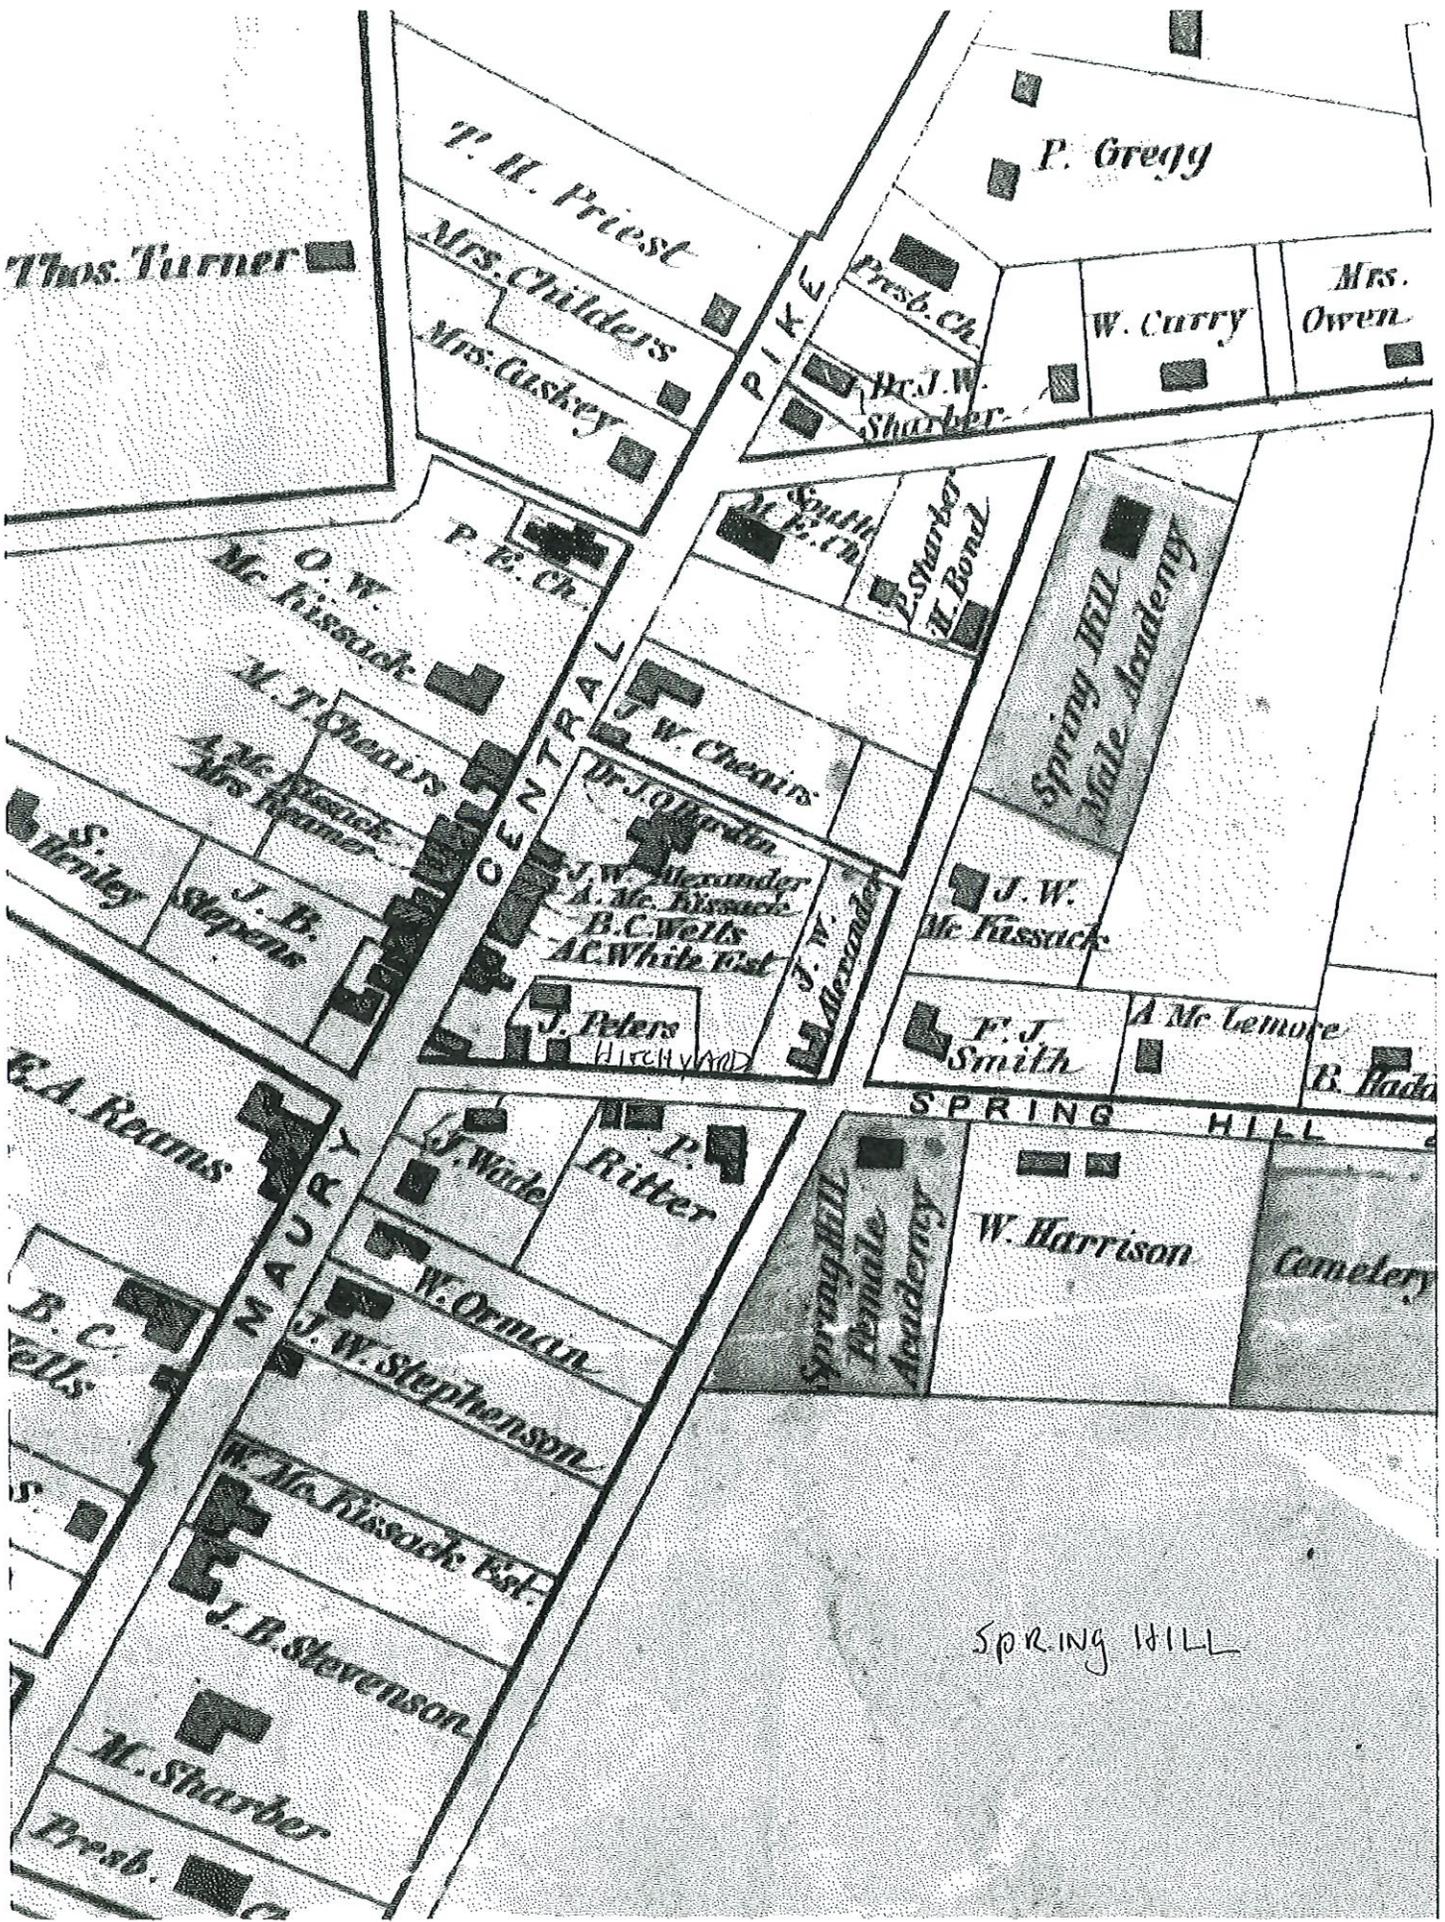

Until this time all dairymen sold butter or cream. Now they started to pick up whole milk from the farm so the cream business passed on. Most of the milk went to the cheese plant.

Radio was beginning to be popular replacing the phonograph.

The gas tractor was beginning to replace steampower and horsepower.

Until this time most of the main roads were turnpikes with tollgates about every five miles. The local people that lived on the road repaired the other roads. In the twenties the state started buying up the turnpikes and the counties took over the local roads. They began a road and bridge building program, which was a great help to the county residents.

Across the street from the present City Hall (1976) were public scales with stock pens and a coal yard. Coal was a good business then
